OBJECTIVE

"To leverage my analytical skills and expertise in data interpretation to contribute effectively to a dynamic team, utilizing advanced statistical methods and data visualization techniques to drive actionable insights and business growth."

EDUCATION

DAVV UNIVERSITY(indore) — *B.Sc.(Computer science)*

july 2010 - june 2013

PROJECTS

NFT SALES PROJECT IN SQL

Led a project focusing on the analysis of real-world NFT sales data obtained from the Cryptopunks project, spanning transactions from January 2018 to December 2021, using SQL as the primary analytical tool. Employed SQL queries to clean and preprocess the dataset, ensuring data integrity and consistency for subsequent analysis.

Healthcare Dashboard in Tableau

Developed Tableau project with healthcare dataset, creating two interactive dashboards and a story with multiple points. Utilized various Tableau features including custom shapes and color to effectively represent health factors.

Car dekho project in Machine learning

Car Price Prediction with Web App (Car Dekho Data) URL (March-May 2024) , Built a machine learning model using Python libraries (scikit-learn) to predict used car prices based on CarDekho data.

SKILLS

Programming Languages:
Python & SQL

Data Analysis:
Pandas, NumPy

Data Visualization:
Matplotlib, Seaborn,Power Bi & Tableau

Microsoft office:
Ms Excel

EXPERIENCE

"5 years of experience working as a math teacher at one of the renowned academies in Indore, Tagore Academy."

Certification

- Data Analysis & Data Science Bootcamp, Upgrad
- Fundamental of Digital Marketing, Google
- Introduction to Generative AI, Google
